

## ReGen: Phishing Simulation

### **CYBER-ATTACKS ARE ON THE RISE**

Because employees are the core of any business, they will be the main target for cyber criminals. Making sure your people stay up-to-date with cyber security knowledge, and teaching them to recognize threats, is imperative to the security of your business. The threat landscape is constantly evolving, and so should your approach to defense. 92.4% of malware is delivered via email 90% of security breaches are inadvertent, unintentional, and caused by human error.

### **TRAIN AND PHISH!**

Trained and aware employees are critical to securing an organization, and an effective, ongoing internal security awareness program can help reduce your company's vulnerability, turning the "weakest link" in your cyber defenses into its greatest strength. Security awareness training and phishing simulations go hand in hand. Phishing has become very sophisticated and almost undetectable, as criminals have found ways to make their emails as realistic as possible. Phishing simulations test employees on how they would respond to a real-life phishing attack.

We can send these mock attacks at staggered times, avoiding the "prairie dog effect" where employees warn one another of the email, for the best measurement of all employees' awareness. We'll track which employees have clicked on a phishing email, who has given away their password and who has ignored the email.

### **About ReGen**

ReGenerating Solutions (ReGen) has been providing technology solutions and services since 1983. ReGen is dedicated to offering quality technology solutions including Hardware and Network Design, Data Backup and Recovery, Dark Web Monitoring, Phishing Simulation Training, Phone systems as well as HelpDesk services.

**ReGenerating Solutions, Inc.**
