

ReGen: Allworx Reach and Reach Link

Popular Use Cases

These services are useful for people who are always on the move and want to be reached at all times, legal and healthcare professionals who want to protect their personal phone numbers, and Professionals who work in a distributed work area, such as showrooms or schools.

Make and Receive Calls Like You're in the Office

You will be able to transfer, hold, and park calls with a single touch, as well as make easy three-way calls.

See Who's Available

You will be able to see your colleague's presence and status. You will also be able to search across the corporate directory, system extensions (e.g., call queues), and personal mobile contacts, as well as tag and sort by favorite contacts.

Access Parked Calls, Call History and Scheduled Calls

You will be able to access parked calls and see call history, as well as call into scheduled conference calls.

Update Your Presence and Status

You will have the ability to change your Allworx presence setting and DND status and automatically update your call routes based on your updated presence/status.

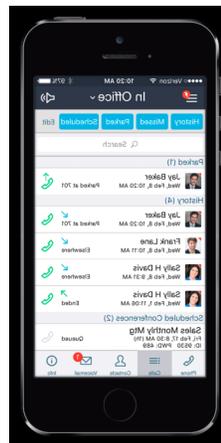

Allworx Reach Link

You will stay connected as your mobile data network changes.

During active Reach calls, the Reach Link will automatically connect active calls as the mobile data network changes from 4G to Wi-Fi, and vice versa. During brief network interruptions, the other party will hear a brief down-tone and an explanation for the interruption.
